

Artful Thinking

Experience Change With Artful Thinking

Heart Studies 2

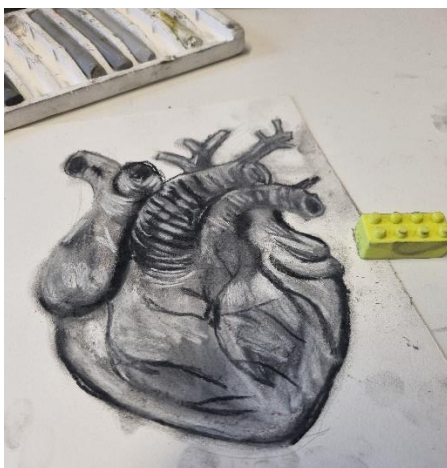

Materials: A5 White card; selection of drawing pencils, access to the internet to find image of anatomical hearts, soft pastels, spray fixative (hair spray).

First set up your workspace, then begin to sketch out your design, thinking about the different shapes, layering them, feathery lines, and contours.

Using the different soft pastels layer the shades, from blacks through to greys.

Use the black pastels to go over the different contours and thicker lines, then using your fingers to smudge and blend the tones.

Use an eraser to clean spaces within the heart, and around it, taking away finger smudges.

Using the soft white pastel and pencils to pull back from the dark tones to add highlights and pencil marks are a great way to add to the finer details.

Remember to spray your work throughout the time you are working on it.
